

E-Risk Management

gbriskcontrol.com

24/7 Access to Your Risk Control Program

www.gbriskcontrol.com is a risk control web platform designed to give you the tools you need to effectively manage your locations, train your staff, communicate important information related to safety and health, and enhance your overall risk control program. The benefits include:

- Customized structure, including logo and colors
- Designed to reflect your organization's distinctive needs in an easy-to-use format
- Unique user name and password available to each user
- Knowledge base of employee-related scenarios to manage situations utilizing correct employment practices
- Links to Background Check service providers
- Online/Web-based training modules addressing safety, health and human resources issues
- Option for development of training programs customized to your specific needs
- Learning Management System (LMS) software built-in for tracking and running reports on course participant progress and quiz results
- Posting of recorded Webinars conducted by a risk control expert and ability to track onsite participant training in the system
- Communication material, including Safety Bulletins and Weekly Best Management Practices Training Bulletins
- Access to Human Resources Self Assessment tools
- Model workplace policies, procedures and forms available from Gallagher Bassett, as well as your own customized information
- Evaluation forms and program recommendations generated from onsite visits by Gallagher Bassett field consulting staff
- Communication center for individual or "blast" correspondence, including informational polls

"We can't say enough about the value this brings to our managing risk and organizing critical information. This powerful website, personalized for our company as well as my individual entities, is helping us replace the need for paper copies and gives us an efficiency that we have never been able to achieve prior."

Online Training Module Topics

www.gbriskcontrol.com offers a number of online training courses addressing safety, health and human resources topics. This database is continually being expanded in response to the growing demand for online training. If a customized training program is needed, Gallagher Bassett will work with your organization to develop a program suited to your needs.

Learning Management System (LMS) software utilizing SCORM is built-in to each training module so that participant progress can be monitored and tracked. Administrators have the capability to run reports on completed modules as well as those in progress.
